-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I in the reply filed on 9-13-06 is acknowledged. The traversal is on the ground(s) that the subject matter of any one group of claims would encompass a search for the subject matter of the remaining claims and that claims 7-9 depend from claim 1. This is not found persuasive because each respective group entails a different field of search. In addition, totally different art would have to be applied for each respective group. Therefore, there is a serious burden in searching all of the claims.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. **Claims 1-4 and 6** are rejected under 35 U.S.C. 102(b) as being anticipated by Miyahara et al. (US5902653).

Miyahara et al. teach an oiling roller assembly, comprising: an oiling roller **1**; a roller

4. shaft **2** about which the oiling roller **1** rotates; and at least one cap unit **3** disposed on an end of the roller shaft **2**. Note that there are an identical pair of caps **2**. Note that the caps **3** have

Art Unit: 3726

a flange and a recess portion to accept shaft 2. Note that the cap 3 “can” be squeezed with an inward force to deflect the roller. In addition, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. **Claim 5** is rejected under 35 U.S.C. 103(a) as being unpatentable over Miyahara.

Miyahara teaches the invention cited above with the exception of specifically disclosing a retainer. However, official notice is taken that it was well known to a person of ordinary skill in the art, at the time of the invention, to have provided the invention of Miyahara with a retainer such as adhesive or clips, in order to securely fasten the cap to the shaft.
